

Alhamdulillah most people are well aware that all forms of photography are forbidden. Many who previously indulged in this sin have stopped taking photographs which indeed is a blessing from Allah Ta'ala. However we are still keeping and holding on to our past photographs. Those albums with our old photographs are still kept safely in our drawers. Let us complete our repentance from the sin of photography, by destroying all our past photographs. If they are stored anywhere, erase them without delay. Unfortunately with the new technology, filming and taking pictures has become a widespread calamity. Let us protect ourselves and our families from all forms of photography. Let us destroy all evidence of our past sin of photography. Likewise we should ensure that the clothes, toys and surroundings of our children are free of all animate pictures, as these keep the angels away.
